COMMENT

Meeting Attended:

I was not able to attend a meeting

Important Issues:

Land Use (Agriculture, Residential, Recreation), Noise, Health and Safety, Biological Resources, Proximity to Residences

Property Uses:

Agriculture, Residential

Comment:

I recently saw a map with the proposed line vs. just a corridor running right down the middle of my place destroying my property. I will absolutely not agree to any power lines on my place, period. I am not an unsophisticated person responding emotionally and I won't ignore the need for growing resources for a growing world but we all have to put the power lines per our covenants under ground and you will have to as well. You need to focus your routes on existing county roads, I could live with that and I think that is reasonable. I am in real estate development in Denver and have been a part of litigation in the past and am familiar with it and eminent domain. I am formally requesting a meeting with your representative to discuss the alternative route that passes through my property. I have read the legal filings between you and Trinchera and others and have contacted attorneys and appraisers in Denver specializing in eminent domain litigation. I have been on your side with many of the real estate developments I propose and know this arena. I need to meet with someone to choose a route off my property or I am going to employ all my resources and organize the entire community against this. This property means everything to me, I care of little else and will not see it destroyed. Thanks, Jason Smith 303-881-7457.

I-146-001: Project Alternatives (In Review)

Your email/letter/comment from has been received and your comment noted. A range of reasonable project alternatives and mitigation measures including the no action alternative will be addressed in the Environmental Impact Statement.

The Environmental Impact Statement is anticipated to be completed in late 2010 and will be available at

<http://www.usda.gov/rus/water/ees/ea.htm>.
